*Antonella Natalis and Romeo*

*“As a teen I started being fascinated (this passion still thrives me) by great artists of seascapes, so I intently watched and studied their charming representations.*

*For several years I have been trying to give concreteness to my own vision of art and tried to transfer my emotions onto canvas, using colors, shades and textures, enchanted atmospheres, either dreamt, conceived by my imagination or coming as a reminiscence of some remote memories.*

*Through my paintings I explore different techniques and feelings, shifting from the shiny “classical” nuances*

*in my palette to the more intense, shady and intimate but never gloomy, nocturnal landscapes.*

*Over the years, I extended my production adding to oil-painted canvas, some of which are huge, also watercolors, mixed with inks and polishes, where this time my subjects are abstract seabeds.*

*You can find some of my works on my Etsy online shop ‘italianmarinepainter’, where they are immediately available; alternatively, you will also be free to ask me a customized project for your house, your bureau, your office or your shop”*

## *Framed paintings*

*When people buy a painting, right after having decided on which wall it will be hanged up, the next choice they will make concerns the frame and its style.*

*Are you in love with anything that is modern and would like to have an amazing ancient frame to valorize the content?*

*Or would you rather opt for a smooth and varnished frame as your furniture, or, as a further alternative, would you prefer a shabby chic frame?*

## *The White Collection*

*In 2015 the White Collection was brought to life  
But why did I take this path? Why did I dedicate  
to white paintings?*

*Following "angry" seas, Caribbean seas, northern seas,  
intense and colorful seas combined with dawns  
and twilights, I decided to disrupt my vision of the sea  
and the way I looked at it.*

*As many other people, I love total white in the furniture  
and decors as well, so I thought of a painting suitable  
even for those who cannot bear an intrusive stain in  
a pure and white setting!*

*I backwards reasoned: "I didn't want anymore a sea  
with white lights, with bright squirts of water, with lower  
tones and veiled drops, but, a White Sea where only  
certain details are colored.*

## Watercolors

Since 2017, a new production, whose main protagonist are seabeds.

Abstract subjects and constantly changing palettes take concreteness on exquisite or alternative supports and on numbered prints.

Each watercolor will be delivered to your house with a packaging to exploit its value and, at the same time, preserve it.

A perfect gift idea for your house or for those friends of yours who appreciate the abstract, textures, complementary colors, but above all unique pieces of art!
